EXPERIENCE

DATA SCIENCE INTERN - Vcodez

June-July 2025

Completed an internship focused on data analysis and machine learning. Gained hands-on experience with data preprocessing, visualization, and model building using Python and related libraries. Collaborated on real-world datasets to derive insights and improve analytical accuracy.

PROJECTS

WEB DEVELOPMENT

- **Freelancer Platform (MERN Stack):** Developed a fully featured freelancing platform with chatbot integration, OTP verification, and Gmail authentication, enabling secure communication and seamless user interaction.
- **Food Blog Website (MERN Stack):** Built a responsive recipe-sharing app with OTP authentication, allowing users to share, edit, and like recipes while focusing on usability and interactive features.
- **Personal Health Tracker** – Health management web app with medication reminders, calorie tracking, and doctor appointment scheduling.
- **Notes App** : Created a simple web application with full CRUD functionality, allowing users to add, edit, and delete notes efficiently.
- **Weather App:** Developed a web application using API integration to display real-time weather updates based on user location, focusing on simplicity and accurate data presentation.

ML/DL

- Built models for spam detection, disease prediction, fake news detection, and recipe recommendation using Python and ML/DL algorithms.

AI

- **AI Chatbot for Website Support:** Built a custom chatbot for website using LangChain, RAG, Ollama model(LLM) for automated user assistance.
- **Document Q/A System:** Developed a Q/A model with LangChain and RAG for document-based answers
- **API-based Chatbot (Gemini):** Created a conversational bot using Gemini API for interactive responses.
- **AI Travel Health Advisor:** AI-powered web app generating personalized travel health recommendations using symptoms, temperature, and weather data.
- **AI Based Feedback Analyser:** AI-powered web app that classifies user feedback into categories with AI-generated explanations and stored results.

TECHNICAL SKILLS

Programming : Python, HTML, CSS, JavaScript, Java .

Tools & Platforms: Visual Studio Code, PyCharm, Postman.

Frameworks/Libraries: React, Node.js, Numpy, Pandas, LangChain.

Additional skills: GitHub, Microsoft Office.
